

Matthew Wittmer / L.A. HOP 7 Team Create Powerful Program Video

Says Matthew Wittmer, "I wanted our members to talk about their general perceptions of our program, their recovery and interactions with our staff. Around 30 of the approximate 120 members in both of Service Area 4's program expressed interest in and participated in the project, as well as various staff. I taped many of our member's residential placements and the hospitals, shelters and recovery programs our members are involved with. Without the support of the entire team, this project would not have been possible. I hope that others can just begin to see what an outpatient mental health center is and realize the vast complexities of the field, the illness and that people are working together to improve their quality of life in Los Angeles." **The video will be shown at the Administrator/Corporate Manager meeting on June 28-30 in San Diego. To learn more about the video please contact L.A. HOP 7.** *Videography by Matthew Wittmer PSCII; Don Hepler, PSCII; Don Helper's father (technical editing); Story submitted by Tiffany Jump.*
